### Views:

- The drop in IIP number from May 2022 is clearly attributed to effects of a 'normalizing base'.
- The healthy growth in capital and infrastructure goods is encouraging, signaling revival in investment activity on the back of capex push. The healthy growth reflected in manufacturing output has given support to overall IIP activity reflecting therein improving demand conditions and easing of supply-side challenges.
- IIP is expected to remain in positive territory going forward.
